

Contains deltamethrin, the active ingredient used in Suspend® SC.

INSECTICIDE

ADJOURN™
SC

FAST-ACTING GENERAL INSECT CONTROL

Adjourn™ SC is a pyrethroid that fights more than 50 nuisance pests indoors and outdoors. Containing the active ingredient deltamethrin, Adjourn SC can help you achieve fast-acting knockdown with an extended residual control that performs at exceptionally low application rates. The odorless formulation can be used as an effective tool providing insect control in and around buildings and structures, and residential and commercial properties. Adjourn SC has a flexible application site label, including mattresses, box springs, carpet, food service areas, and more. Treat perimeters and fight off unwanted pests with the power of Adjourn SC.

KEY BENEFITS

- For use indoors and outdoors
- Approved for a wide variety of pests and application sites
- Long-lasting residual control
- Leaves a clear residue with no odor or staining

KEY USES

Both Indoor and Outdoor:

- Buildings and structures
- Established landscapes ornamentals around residential and commercial properties

Refer to label for specific use restrictions.

APPLICATION INFORMATION

Adjourn SC can be applied to walls, floors, ceilings, in and around cabinets, between, behind and beneath equipment and appliances, around floor drains, window and door frames and around plumbing, sinks and other possible pest harborage sites.

Treat where pests have been seen or found or can find shelter. Treat areas where pests normally feed or hide, such as baseboards, corners, around water pipes, behind and under refrigerators, cabinets, sinks and stoves. Treat entry points around water pipes, utility penetrations, windows, doors, vents, and eaves.

Void applications can be made behind veneers, piers, and chimney bases, into rubble foundations, into block voids and structural voids, wall voids, under slabs, stoops, porches or to the soil in crawlspaces, and other similar voids. Spot treat floors, floor coverings, carpets, or rugs for flea and tick control; Do not treat the entire floor area.

USE RATES

- For a 0.01% a.i. concentrate, use 0.25 fl. oz. Adjourn SC per gallon of water
- For a 0.03% a.i. concentration, use 0.75 fl. oz. of Adjourn SC per gallon of water.
- For a 0.06% a.i. concentration, use 1.50 fl. oz. of Adjourn SC per gallon of water.

HOW TO APPLY

Spot Treatment: Apply Adjourn SC using a low-pressure system (do not exceed 50 psi at nozzle) with a fan-type nozzle to uniformly apply spot treatments in and around cupboards and between, beneath, and behind equipment or appliances. In the home, all food processing surfaces and utensils must be covered before treatment or thoroughly washed after treatment. Cover exposed food or remove from area being treated.

Spray, Mist or Foam, Crack and Crevice, or Void: Apply Adjourn SC spray, mist or foam directly into cracks and crevice or voids where pests or their nests are found.

- **Spray:** Apply Adjourn SC spray mixture to cracks and crevices in and around baseboards, floors, walls, appliances, areas around water and sewer pipes, and other voids with a low-pressure system (do not exceed 50 psi at nozzle tip) using a pinpoint or variable pattern nozzle.
- **Mist:** Use appropriate mist-generating equipment. Do not allow the mist to drift out of void spaces into commonly occupied areas of the structure.
- **Foam:** Use foam to treat structural voids and control pests in walls, under slabs, or other void areas. Using appropriate foam generating equipment, mix dilution with manufacturer's specified volume of foaming agent and apply sufficient volume of foam.

WHEN TO APPLY

Apply when pests are seen or found. Treat areas that insects inhabit or where they are normally found. Use 0.25 to 1.5 fluid ounces of Adjourn SC per gallon of water and apply to adequately cover 1000 square feet. Under conditions of severe pest infestation, when quick knockdown and/or longer residual control is desired, use 1.5 ounces of 0.06% Adjourn SC per 1,000 sq. ft. Treatments may be made at 21-day intervals to maintain adequate control.

Refer to product label for complete application and mixing instructions.
