

IMAZAPYR 4 SL

AN EXCEPTIONAL BARE-GROUND AND FORESTRY HERBICIDE THAT IS ALSO HIGHLY EFFECTIVE ON UNWANTED VEGETATION IN RANGELAND AND AQUATIC SPACES

Alligare's Imazapyr 4 SL offers broad spectrum control of 185 annual, biennial, and perennial weeds and brush. This pre- and post-emergent, non-selective herbicide is ideal for a variety of use sites.

PERFORMANCE HIGHLIGHTS

- Controls most grasses, broadleaf weeds, vines, brambles, and hardwood brush for forestry site preparation
- Excellent choice for the release of conifers from hardwood competition
- Outstanding control of emerged and floating vegetation in aquatic environments
- Long-lasting, residual control when included in bare-ground applications
- May be applied as a broadcast, targeted handgun, low volume, cut stump, or basal application

FOR BEST RESULTS

1. Use a methylated seed oil or nonionic surfactant as an adjuvant to maximize efficacy.
2. Apply the spray solution uniformly to cover the foliage of undesirable vegetation.
3. Basal applications are best suited for low-density brush areas where stems do not exceed 700 stems per acre.
4. Precautions should be taken when applying Imazapyr 4 SL in sensitive areas and within the root zone of desirable plants and tree species.

USE SITES

- forestry sites
- pastures and rangeland
- railroad and utility rights-of-way
- non-irrigation ditch banks
- wildlife management areas
- aquatic sites
- wildlife openings
- fencerows and storage areas
- industrial and utility plant sites
- CRP areas

IMAZAPYR 4 SL

ACTIVE INGREDIENT: IMAZAPYR 4 LB/GAL

TARGETED WEEDS

Alligator weed
Arrowhead
Cattails
Water hyacinth
Giant reed
Water lettuce

Brazilian pepper
Chinese tallow
Cherry
Vine maple
Saltcedar
Taro

Cogon grass
Giant ragweed
Sericea lespedeza
Johnsongrass
Purple loosestrife
Sweetgum

Phragmites
Puncturevine
Russian olive
Madrone
Wild carrot
Willow

BROADCAST MIXING INSTRUCTIONS

1. Add ½ of the required spray volume to the spray tank and start agitation.
2. Add the required amount of Imazapyr 4 SL.
3. Add additional tank-mix herbicide partners as needed.
4. Add any additional surfactants.
5. Agitate during the final filling of the spray tank, and maintain sufficient agitation during application, to ensure uniformity of the spray mixture.

NOTE: Tank mixing with 2,4-D or other phenoxy-type herbicides could lead to reduced control of perennial grass weeds.

ALWAYS READ AND FOLLOW LABEL INSTRUCTIONS

SIGNAL WORD

CAUTION

APPLICATION DETAILS

MOA Group 2, ALS Inhibitor
Use Rate 8 - 48 ounces/acre

WORKER SAFETY

long-sleeved shirt and long pants
chemical-resistant gloves
shoes plus socks
