*Beginning range for first spring application. Seedhead Suppression GDD model differs from PGR Re-application Interval model, visit GDDTracker.net for details.

BEST PRACTICES

- Use enough volume to wet turfgrass without significant runoff.
- Do not irrigate or water treated areas within four hours of application.
- Include a non-ionic surfactant for improved coverage and performance consistency.
- Include 1 lb ammonium sulfate per pint (16 fl oz) of Anuew EZ if water source is hard (> 140ppm calcium).

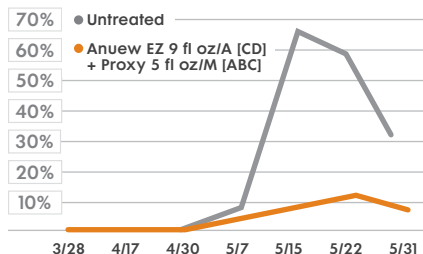

DON'T LET SEEDHEADS STAND IN THE WAY

Seedhead suppression is a real science. That's why we've run trial after trial to uncover best solutions for proven Poa seedhead reduction. The results may surprise you.

A PGR COMBO DELIVERS PUNCH AND FLEXIBILITY

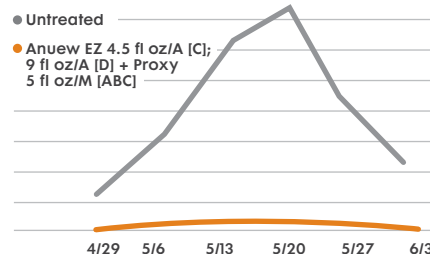

Achieve top suppression results plus added flexibility by combining Proxy® and Anuew™ EZ. Anuew EZ can widen the application window for a seedhead suppression application and relieve the pressure of a perfectly timed Proxy application.
