

BOV-A-MURA® NUTRIENT SUPPLEMENT

Effective, easy to use product for natural turf management.

Bov-A-Mura® is made by a patented process which converts dairy manure to a soluble, consistent and easy-to-use spray formulation. Manure from selected dairy farms is filtered, blended and stabilized into a uniform solution. Bov-A-Mura is then treated to make it acceptable for use on fine turfgrasses.

Bov-A-Mura has been used on the finest championship golf courses, race tracks, football fields, sports fields, grass tennis courts and other fine turf areas in the United States and Europe for many years. Many professional turf managers have found that Bov-A-Mura filled a need in their turf care programs.

No fertilizer is 100% available and no plant is 100%

efficient in taking up applied nutrients from the soil. Bov-A-Mura helps overcome this soil immobilization. The nitrogen and natural organic matter in Bov-A-Mura furnishes needed energy for soil microbes.

Bov-A-Mura enhances good turf and soil management programs.

Timing of the fertilizer applications is important to ensure that available nutrients can be used by the turf. Bov-A-Mura can improve the establishment of seeded, plugged, sprigged or sodded turfgrass. In addition, Bov-A-Mura can supplement a maintenance fertilizer program based upon soil recommendations for established turf.

Bov-A-Mura is a registered trademark of PBI-GORDON CORPORATION.

RECOMMENDATIONS

For fast sod knit down, soil microorganism stimulation and fertilization program enhancement.

GUARANTEED ANALYSIS:

Total Nitrogen (N) 5%
5% Urea Nitrogen
Derived from Urea
Nitrogen: 100% Synthetic Organic

PACKAGING:

2 X 2.5 gallons per case:
shipping weight. 47 lbs.

- Promotes root growth
- Produces dense hard-wearing turf
- Supports the development of soil microorganisms
- Speeds up "knitting down" new sod

- Assists establishment of newly seeded, plugged or sprigged turfgrass
- Transforms "locked-up" nutrients to useable plant food
- Absorbed through roots and leaves
