

FLOWERS KISS™

Foliar Plant Food Concentrate

Survival of the fittest is a way of life in the rainforest. Layer upon layer of giants lift their foliage to the sky where sunlight, water and nutrients can be claimed. Isn't it great that your plants don't have to fight to survive? BushDoctor® FlowersKiss™ spray-on foliar plant food is designed to be absorbed through the leaves, like a soft rain, providing nutrition from the top down.

DIRECTIONS FOR USE

How Much:	Mix 2 teaspoons (10mL) per gallon of fresh water. Fill sprayer with solution and turn nozzle to mist setting.
How to Use:	Begin feeding seedlings after they have become well established, usually 3 to 4 weeks after germination. Spray once a week until fruit and bud development occurs. Do not apply Flowers Kiss™ in the heat of the day or under illuminated high intensity lighting.

FOR BEST RESULTS: Follow the FoxFarm nutrient feeding schedule available online at www.foxfarmfertilizer.com or at your nearest garden retailer. While you're there, be sure to check out FoxFarm's exceptional line of professional grow products.

WARNING: This product contains substances known to the State of California to cause cancer and birth defects or other reproductive harm. We do not add these substances to our products, but they are present in the ingredients we use.

Not for use in organic crop and food production in California.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

Warning: Keep out of reach of children. Harmful if swallowed.
