

PRESSURIZING TANK TOP

B&G Pressurizing Tank Top (PTT) replaces the standard pump mechanism on B&G stainless steel sprayers, reducing the cost of downtime and replacement parts for the pump mechanism.

FEATURES & BENEFITS

SEAMLESS INTEGRATION WITH B&G PRIMELINE TANKS

Easily attaches to the top of B&G Primeline tanks, replacing the pumping mechanism

CONSISTENT FLOW & UNIFORM SPRAY

Ensures a uniform spray pattern with a consistent flow of formulation

MAINTAINS 30 PSI IN TANK

Automatically repressurizes to 30 psi when it detects a drop to 23 psi

- First time to pressurize: 2.5 minutes

REDUCES TIME & FATIGUE ON JOB

Save 5 minutes per gallon, reducing fatigue on every job

LONG-LASTING RECHARGEABLE BATTERY

Provides up to 4 hours of use per charge (27-30 gallons)

- Output: DC 12.6V/2A
- Recharges in about 5 hours
- Light on charger indicates charging status

ACCESSORIES INCLUDED

- **Car Charging Adapter** - Conveniently charge on-the-go with the included car charging adapter.
- **Tank Lid** - Equipped with a tank lid for secure closure while the PTT is being charged

INDUSTRIES

- Pest control
- Sanitation
- Agriculture

COMPATIBILITY

Primeline sprayers
