

Installation Instructions

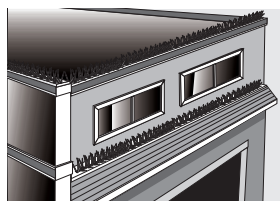

Enviro Spike® Plastic Bird Spike

Keep pigeons, seagulls, or larger birds from landing and roosting in unwanted areas with Bird•B•Gone® Enviro Spike® Plastic Bird Spikes! Bird spikes are an effective, humane and cost-effective bird control solution that will not harm birds. Bird•B•Gone® Enviro Spike® Plastic Bird Spikes are ready to use and easy to install. No assembly required. Each bird spike strip comes pre-assembled in one foot sections, can be glued, screwed, or tied down to most surfaces and can easily be cut down into smaller lengths if needed.

BIRD SPIKES ARE NOT RECOMMENDED IN AREAS WHERE BIRDS ARE NESTING.

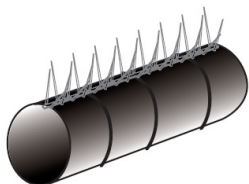

APPLICATIONS

Enviro Spike™ Plastic Bird Spikes is a versatile system that can be easily glued, screwed, or tied down to various surfaces.

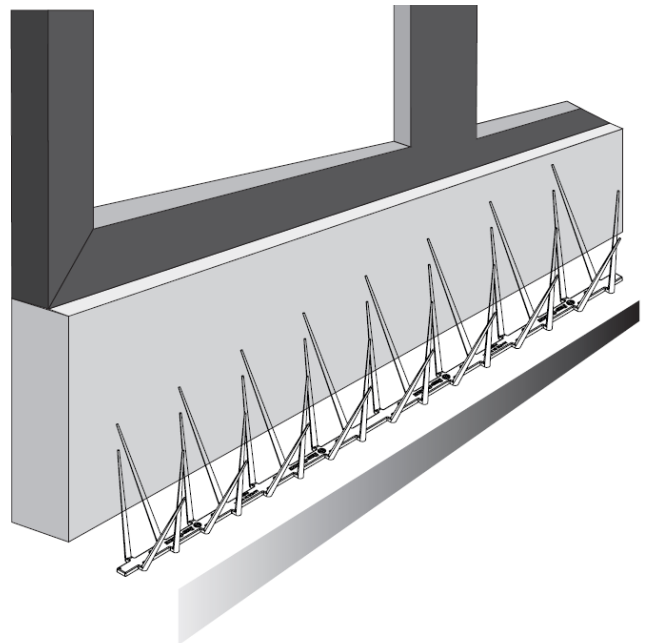

Ledges:

Enviro Spike® Plastic Bird Spikes prevent pest birds from congregating on ledges, sills, roof tops, etc. Installing Enviro Spike® Plastic Bird Spikes will stop birds from landing, roosting, and creating unsightly messes and health problems.

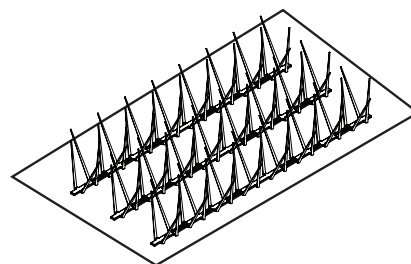

Conduit:

Enviro Spike® Plastic Bird Spikes can be attached to wires, conduit, gutters, and pipes by using common hose clamps, nylon ties, wire, or glue.

Bird Species	Pigeons, seagulls or larger birds
Bird Pressure	Light to Medium
Where to Use	Roof peaks, ledges, beams, rooflines, parapet walls, eaves, I-beams, windowsills, light posts, signs, and more.

Large Flat Surface:

Enviro Spike® Plastic Bird Spikes can be installed in multiple rows for a wider area of coverage.

Installation Instructions

Enviro Spike[®] Plastic Bird Spike

CAUTION: READ AND FOLLOW ALL INSTRUCTIONS PRIOR TO INSTALLATION. SPIKES ARE SHARP. WEAR GLOVES AND SAFETY EYE WEAR. KEEP OUT OF REACH OF CHILDREN AND PETS. DO NOT INSTALL WHERE HUMAN PHYSICAL CONTACT IS POSSIBLE. VISIT BIRDBGONE.COM/SAFETY

1. DISINFECT AND CLEAN ALL SURFACE AREAS

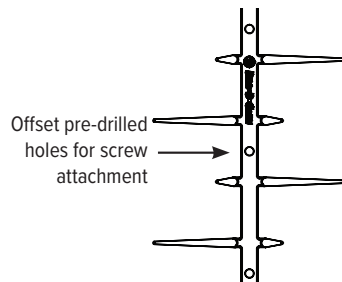

Remove all debris including overhanging branches, leaves, nests, etc. Clean and disinfect area using hospital grade disinfectant. We recommend Microcide SQ™. Allow area to dry before installation. Visit birdbgone.com/safety for additional information.

DUE TO INFECTIOUS DISEASES ASSOCIATED WITH BIRD FECES, USE EXTREME CARE WHEN REMOVING NESTS AND BIRD DROPPINGS.

2. DETERMINE THE METHOD OF ATTACHMENT

For Concrete, Brick, Steel: Adhere bird spike strips using outdoor construction-grade adhesive. Run a bead of adhesive along the base of each bird spike strip. Press bird spike strip into place allowing the adhesive to mushroom-up through the screw holes for more effective adhesion. One caulking tube of adhesive will adhere approximately 25 ft. of bird spike strips. For a list of recommended adhesives, visit our website at birdbgone.com.

For Wood: Use wood screws to secure bird spike strips to wood surfaces. Following pre-drilled holes along the bird spike strip base, screw tightly into the end of each strip; place one wood screw at least every six inches along the strip base.

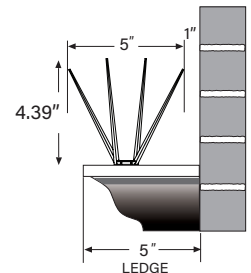

Tie Down: For pipes and other areas, secure bird spike strips with nylon ties by wrapping and securing the tie around the base of the bird spike strip.

NOTE: WHENEVER POSSIBLE, BIRD SPIKE STRIPS SHOULD BE SCREWED OR BOLTED DOWN IN CONJUNCTION WITH THE USE AN OUTDOOR CONSTRUCTION-GRADE ADHESIVE.

3. SPIKE PLACEMENT

- To prevent birds from nesting behind the spike, leave no more than 1" gap between the wall and the bird spike strip.
- To prevent birds from sitting on the ledge, leave a minimum of ½" overhang between the tip of the bird spike and front/leading edge.

- For wide areas, multiple rows of bird spike strips may need to be installed. Install bird spike strips with 1" overlap.

4. ADAPTING TO SIZE

Enviro Spike[®] can be easily cut to desired size using tin snips or wire cutters.
