

SUPPLEMENTAL LABELING

26/36® Fungicide

EPA Registration No. 432-1414-1001

Now For Use on Pink and Gray Snow Mold in Golf, Sod, and Institutional Turf Sites

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read this label and the product package label before using this product. This Supplemental Labeling must be in the possession of the user at the time of pesticide use. Follow all other applicable directions, restrictions and precautions on the registered product label.

26/36® Fungicide is a foliar applied fungicide recommended for turfgrass disease control on golf courses, sod farms, and institutional areas where fine turf is grown. It provides effective broad spectrum disease management when used in conjunction with good turf management practices, alone or tank mixed with other compatible fungicides. The following supplemental information is to be used for the management of the snow mold diseases identified.

TURF		
Diseases	Interval of Application	Fluid OZ. Per 1,000 Sq.ft.
Gray Snow Mold (Typhula sp.)	One application before permanent snow cover if possible, another application during a mid-winter thaw.	4-8
Pink Snow Mold (Fusarium nivale)		

Tank Mixtures

Snow Molds: For over wintering management of Pink and Gray Snow Mold, apply Spotrete™, Endorse®, or Ultrex® and Alude™ or Signature® fungicides with 26/36® Fungicide. If a tank mixture is used, follow label directions for the use of that product.

KEEP OUT OF REACH OF CHILDREN

WARNING

For First Aid and other Precautionary Statements, see label attached to container.
