## Help For Your Horse's Hoof

Dry weather, dusty stables, lack of exercise. These factors combine to rob a horse's hoofs of moisture, leaving them hard and brittle; susceptible to cracks, injury and disease; unable to regenerate quickly because of slowed growth.

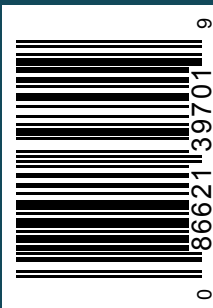

Rain Maker™ Hoof Moisturizer and Conditioner can protect your horse's hoofs from these damaging conditions. Like a rainy day, Rain Maker™ Hoof Moisturizer and Conditioner leaves hoofs with a healthy balance of moisture. It's an advanced hoof dressing that helps restore and condition damaged hoofs, so they can absorb the stresses and shocks of daily life with ease.

The triple action formula of Rain Maker™ Hoof Moisturizer and Conditioner leaves your horse with hoofs that attract, absorb and retain moisture. Helps prevent painful problems like cracks, splits and contracted heels. Enhances color, sheen and texture, leaves hoofs with a natural glossy, lustrous appearance.

## How To Use Rain Maker™ Hoof Moisturizer and Conditioner

Before applying Rain Maker™ Hoof Moisturizer and Conditioner, be sure the sole and wall of the hoof are clean and dry. Pick out the soles and clefts of the frog to remove any foreign matter.

First, using the handy applicator brush provided, work Rain Maker™ Hoof Moisturizer and Conditioner into the frog, the sole and over the bulbs of the heel. Next, apply to the hoof wall to aid in restoration of the periople (protective coating of the horn), retard moisture loss and give the hoof a natural sheen. Using the applicator brush, also massage Rain Maker™ Hoof Moisturizer and Conditioner into the coronary band to approximately one inch above the hoof wall. Repeat treatment as needed. Most hoofs respond favorably to an application once or twice a week.
