

# BUSH DOCTOR

## Kangaroots

**Bush Doctor Kangaroots®** is a liquid root drench formulation designed to enhance the proliferation and root mass development of both primary and secondary roots. Natural and organic, Kangaroots® contains nutrients specifically designed to be immediately available to plants and roots alike. Kangaroots® also contains concentrated amounts of microbes designed for hosting not only directly on the roots, but in the soil around them. Kangaroots® supplies essential macro and micronutrients that plants thrive on. Kangaroots® can be used in both hydroponic and soil applications. For optimal results, follow the FoxFarm feeding schedule.

**Directions:** For in-ground gardens mix 2 teaspoons per gallon of fresh water every other week throughout the vegetative and blooming cycles. For hydroponic systems mix 1/2 teaspoon per gallon of fresh reservoir water and use in conjunction with nutrient regimen. Flush system every two weeks.

**Derived From:** Earthworm Castings, Manganese Sulfate, Zinc Sulfate, Protein Hydrolysate, and Kelp (*Ascophyllum nodosum*)

Available in Quart and Gallon Sizes

Growing System	In-ground gardens and container plantings:	Hydroponic recirculating systems:
<b>How Much:</b>	Mix 2 teaspoons (10mL) per gallon of fresh water.	Mix 1/2 teaspoon (2.5mL) per gallon of fresh reservoir water.
<b>How to Use:</b>	Drench soil or preferred medium thoroughly. Apply every other week throughout the vegetative and blooming cycles, particularly during the earlier stages of plant development.	Use in conjunction with FoxFarm fertilizers or any nutrient regimen. Flush system every two weeks.
