

FRUIT FLY TRAP

Easy-to-Use, Advanced Patent-Pending Design

Non-Toxic, Dual Lure
Attracts Fruit Flies Fast

Glue Surfaces Inside
Helps Stop Escapes

Stops Flies From Breeding & Multiplying

2 Traps/60 Day Supply

Our innovative, patent-pending Maggie's Farm Fruit Fly Trap is designed to discreetly lure and capture fruit flies. Maggie's Farm Fruit Fly Trap is unique in two ways:

1. It uses a dual tablet and liquid attraction system. The tablet effervesces when activated by the liquid, giving off carbon dioxide which is an attractant for the flies, and also helps to disperse the scent of the multiple food attractants in the tablet and liquid.

2. The glue surface inside the trap provides another way to capture the flies, in addition to drowning in the liquid like most traps.

Package Contents: 2 Fruit Fly Traps, 2 Tablets (one per trap) and 1 Tube of Liquid (to be divided between the two traps).

Filling and Activating the Traps:

1. Push the tablet through the hole on top of the trap. If the hole is not completely cut out, pushing the tablet through the pre-cut hole will open it up.

2. Squeeze about half of the tube of the liquid in the Fruit Fly Lure tube (about 0.4 fl oz) into the hole of the trap to activate it.

3. The trap will work for up to 30 days. Fruit flies that enter the trap then drown in the liquid or get stuck in the glue. Discard the trap after 30 days.

The Fruit Fly Trap works best when used with the tablets and Fruit Fly Lure included in the package.

But just in case:

- If you misplace a tablet, the Fruit Fly Lure alone will still work, but may not be as effective.
- If you run out of the Fruit Fly Lure liquid (i.e. if you used too much in the first trap, etc.), you can add a tablespoon of any type of vinegar, or apple or grape juice to the Fruit Fly Lure liquid that is in the trap.

Placement of Traps:

- Place traps in areas near the fruit fly problem (i.e. common problem areas found are around kitchen fruit bowls and near garbage storage areas.) Place traps on or under counters, sinks, or near unrefrigerated fruits/vegetables.
- Place traps where they won't be disturbed.
- If using two traps, space them at least 8 feet apart.

Storage: Store unused product in original container, in a cool, dry place.

Disposal: Place container in trash.

KEEP OUT OF REACH OF CHILDREN

CAUTION: Liquid may cause eye irritation. Keep away from eyes. Wash hands after handling.

Limitations of Liability: Maggie's Farm Ltd makes no warranties of merchantability or fitness for any purpose except expressed on this label. Buyer assumes all responsibility for safety and use not in accordance with label directions and precautions.
