Caution

Contents under pressure. Do not use in the presence of an open flame or spark.

This product stains. Avoid contact with hands, clothes, and objects.

Storage

Do not place in hot water or near radiators, stoves or other sources of heat. Do not puncture or incinerate container. Do not store at temperatures above 50°C (122°F).

AluShield™ Aerosol Bandage

Spray it on and it stays! The Water Resistant Aerosol Bandage

Water Resistant

AluShield contains a proprietary carrier that causes the active wound-protective formula to adhere to the skin without washing off in hot or cold water. AluShield can be easily removed with soapy water to inspect the wound. The usual reapplication of AluShield is daily to every three days to insure that an optimal bacterial barrier is maintained.

Essential To Wound Recovery

AluShield Aerosol Bandage allows the wound to oxygenate (breathe), aiding wound healing. AluShield may also be applied over ointment or salves.

First Aid

AluShield is a must have product for equine and farm first aid kits due to frequent injuries and accidents experienced by horses and farm animals.

Safe

AluShield may be used safely on superficial wounds for protection against bacterial contamination. AluShield does not contain sulfa or other antibiotics, making it permissible to use on food animals.

Small Animals

AluShield can be used for wound treatment in dogs and cats as well.

Features

- No antibiotic residues
- Fast and easy spray application
- Allows the wound to breathe
- Reduces risk of infection
- Protection without pain
- Exceptional adhesion
- Removable with soap
- Essential to all first aid kits
- Useful in both large and small animals

Great for:

- Dehorning
- Castrating
- Tail docking
- Summer sores
- Minor cuts and scrapes
