# **GREEN AGENT**

**15-25-05**

Pennington's newest solution creates a high quality fertilizer offering in the sports turf industry. Unmatched in agronomic products for sports turf, Pennington's "Green Agent" is a fertilizer which can bridge the gap between agricultural fertilizer products ill-suited for cutting edge turf and ornamental fertilizer. The result is a unique, best-of-both-worlds product with distinct advantages for the sports turf and landscape market.

## **KEY BENEFITS**

- No filler reduces blend's particle size for reduced abrasion to hydraulic pumps
- Filler is replaced with cutting-edge Nutri-Pel®, a naturally derived source of essential micronutrients
- Water-Insoluble UF Nitrogen prevents up to 30-40% of nitrogen from leaching upon application vs. common urea-based blends
- UF (Urea-Formaldehyde) is broken down by microbial activity, slowing down the nutrient release curve to better feed the plant during critical growth stages
- Nutri-Pel® natural filler replacement contains 85% water-insoluble nitrogen and 1.5%Fe in a standard turf SGN size
- Nutri-Pel® contains Humic Acid, Calcium, and Sulfur necessary for seedling growth

<b>SIZE</b>	<b>APPLICATION RATE</b>	<b>COVERAGE</b>
50 lb bag	200 lb minimum per acre	11,000 sq. ft.
