

Quality Pheromones and Trapping Systems

Insects Limited, Inc. researches, tests, develops, manufactures, and distributes quality pheromones and trapping systems for food infesting insects to a global marketplace with a focus on the statement above. At our core, Insects Limited focuses on bringing **Science, Education, and Innovation to the Stored Product Industry.**

Red-Legged Ham Beetle Kit (IL-660)

Product Description

Comes in quantities of 10 or 100 traps and lures.

Features and Benefits

Red-Legged Ham Beetle kits feature Insect Limited's signature pheromone lures that use a pheromone mixed into a food attractant to draw-in Red-Legged Ham Beetle, *Necrobia rufipes* over a 3-month period. The lures are paired with the Trapper Museum Monitor traps. Together, they are the recommended, field-tested and best trapping system for these beetles. These traps can easily be placed on floors, under display shelving or beneath equipment throughout areas where Red-Legged Ham Beetles are found. Red-Legged Ham Beetle adults and larvae that are attracted to the lure are readily stuck in the glue upon entering the trap.

How This Product Can Help You

This Red-Legged Ham Beetle Kit pairs the science of insect biology to the technology of a trapping system to assist you with the task of monitoring for these pests in your environment. In an Integrated Pest Management program, monitoring can ultimately help you reduce pest numbers. The kit does this by:

- Telling you if the beetles are present
- Indicating where they are coming from
- Finally telling you whether the control measures (E.g. removal of the infested product, increased sanitation, freezing, etc.) that you have taken are working or not.

What to Expect

When you open this kit box, you will find the traps unfolded, and stacked along with a zipper-lock resealable bag containing 10 of the Red-Legged Ham Beetle lures and an Instruction Sheet of:

- How to place the lure into the trap
- Where to place the traps
- When to replace the traps.

The traps will need to be folded into place by hand, according to the instructions on the back of the kit box. The glue pad on each trap is covered with an easily removed plastic cover that should be removed after the traps have been folded into place.

Each pheromone lure is individually packaged to keep them fresh until you are ready to place them into a trap. When you are ready to use this product, the lures should be removed from their packaging and placed on their sides into the center of the glue pads on each trap.

The traps are then ready to be placed out in areas where insects are being seen to begin monitoring for any and all pests moving through that area. These traps will give you the information that you need to reduce or remove your pest issue.

Shipping Information

Each Red-Legged Ham Beetle Kit box has dimensions of 10 inches X 6 inches X 4 inches and weighs 2 lbs for shipping purposes. Online customers can choose their shipping options at checkout. Orders placed before 3pm EST typically get processed that day. If placed after 3pm EST, your order will be processed the next business day. Orders are shipped Monday-Friday.
