

WEB OUT[®]

Web Remover and Spider Pesticide

Spider webs can be a problem area on many accounts. Web Out can help speed up service by making web removal from surfaces – and even your web duster – clean and easy, and by helping to prevent spiders from attaching webs to treated surfaces. Web Out can even be used over water, so it's great for marinas!

Web Out is a 25(b) FIFRA exempt product made from a blend of essential oils and vinegar. It is a contact pesticide that kills spiders, mosquitoes, cockroaches and many other listed general pests.

Products containing essential oils can stain surfaces that can absorb oil. Always test an inconspicuous area for colorfastness or oil absorption before use.
